The legal technical development and the constant demand in function of speeding up the conclusion of the agrarian procedures, diminishing to the maximum the complaints of the population and unifying each and every one of the files that take root in the national territory, besides the time elapsed in the application of the different legal norms, forces us to establish the practical methodology in the conformation and conclusion of the agrarian processes that begin in each territory.

In the Ground Control at the municipal, provincial and national levels, the following matters are settled and processed:
